Re: Progress Report for Water Testing

Dear Mr. Root:

Thank you for allowing Stohl Environmental LLC to assist the Fillmore Central School District with water sampling and analysis as required by NYS regulations.

As of November 8, 2016, the following is reported:

- On October 3, 2016, Stohl Environmental LLC received from District personnel (80) water samples and floor plan maps marking sample locations. Samples were reported to have been collected by District personnel from potable water outlets, and were collected as "first-draw" water samples. "First-draw" is defined as samples collected so that water in the pipes was unused for at least 8 hours but not more than 18 hours.
- On October 11, 2016, Stohl Environmental completed chain-of-custody documents for submission of the (80) samples to Schenider Laboratories Global, Inc., an independent NYS ELAP approved laboratory. Analysis was requested for lead concentration by method EPA 200.9 Rev 2.2 Drinking Water.
- Expected Laboratory Analysis:
 - **Prekindergarten through Grade Level 12:** As of November 8, 2016, sample results are pending. Consistent with the unprecedented volume of samples collected throughout NYS, it is estimated that laboratory results should be received by the District within the next 4 to 6 weeks.

If you have any questions on the matters reported here; or, if we can be of assistance in any other way, please do not hesitate to call.

Sincerely,
Stohl Environmental LLC
